# GENKI GREENS

# Genki Greens

## Solution & Technology

Solution: Agritech / Sustainable E-commerce

Technology: WordPress (WooCommerce), PHP, HTML5, CSS3

## Overview & Key Features

A Dutch urban farming initiative specializing in the sustainable cultivation and direct sale of nutrient-dense microgreens. A specialized vertical farming brand that delivers fresh, locally grown microgreens.

## Key Features:

- Responsive Layout: Optimized specifically for mobile use, allowing chefs to place orders easily from the kitchen.

- Grown-to-Order Model: A sustainability feature where crops are planted specifically upon order receipt to eliminate food waste.

- WooCommerce Store: A robust e-commerce backend managing inventory, specific harvest cycles, and orders.

- Contact Integration: Direct inquiry forms for custom B2B partnerships and sample requests.

# Chia Network

## Solution & Technology

Solution: Layer 1 Blockchain / Enterprise Cryptocurrency

Technology: Python, Rust, Chialisp, React, Electron, Proof of Space & Time (PoST)

## Overview & Key Features

Overview: An eco-friendly blockchain platform that replaces energy-intensive mining with "farming" using unused hard drive space.

Key Features:

- Asset Tokenization: Enterprise-grade standards (CATs) for issuing real-world assets and NFTs.

- Peer-to-Peer Offers: Native, trustless decentralized exchange capability for swapping assets directly.

- Verifiable Delay Functions (VDF): Cryptographic time-proofs that prevent manipulation and ensure consistent block intervals.

- BLS Signatures: Allows for non-interactive aggregation of signatures, improving scalability.

# Virality System

## Solution & Technology

Solution: Social Networking / Content Monetization

Technology: iOS Native (Swift), In-App Purchases

## Overview & Key Features

Overview: A content platform that empowers creators to gain visibility and earnings without relying on unpredictable algorithms. It introduces a "VIR" mechanism where users can set a price per minute for their content

Key Features:

- Algorithm-Free Visibility: Allows users to "invest" to get content seen rather than hoping for viral luck.

- Monetization (VIR): Set a "price per minute" for content to earn directly from engagement.

- Wallet Integration: Supports Apple Wallet for managing passes or digital assets related to the ecosystem.

- Video Progress Bar: Enhanced video playback experience for better user engagement.

- In-App Currency: Uses a point-based system (VIR points) for transactions and visibility boosting.

# Folks – Meet work friends

## Solution & Technology

Solution: Social Networking /
Professional Networking

Technology: iOS Native (Swift)

## Overview & Key Features

Overview: Folks breathes life back into
the hybrid workplace by connecting
employees with their colleagues in
real-time. It solves the "ghost office"
problem by letting users see who is
coming into the office

Key Features:

• See You IRL: A scheduling feature
  where users share their in-office
  days for the upcoming week to
  coordinate with teammates.

• Colleague Discovery: A directory to
  find and get introduced to new
  people within the organization

• Invitation System: Simple tools to
  invite coworkers to join the app and
  build the internal community.

• Location-Based Status: Likely uses
  coarse location data to verify office
  presence or suggest nearby
  colleagues.

• Real-time Synchronization: Instant
  updates on colleague schedules and
  invitations.

# CabinMate

## Solution & Technology

Solution: Travel / Social Networking

Technology: iOS Native (Swift/ Objective-C), Web Backend (CruisesToClick integration)

## Overview & Key Features

Overview: A niche travel utility app designed to solve the "single supplement" surcharge problem for solo cruisers. It acts as a matchmaking service, pairing solo travelers with compatible cabin mates.

Key Features:

- Compatibility Matching: Algorithm-based scoring to suggest roommates with similar interests and habits.

- Anonymous Chat: Secure in-app messaging to get to know potential cabin mates before committing.

- Cruise Booking Integration: Direct link to hundreds of cruises via "CruisesToClick" with the ability to place holds without immediate payment.

- Push Notifications: Alerts users when a highly compatible new "CabinMate" registers.

# Candy's Cake Pops

## Solution & Technology

Solution: E-commerce / Specialty Bakery

Technology: Shopify (likely), HTML5, Interactive Design Tools

## Overview & Key Features

Overview: The premier online destination for ordering cake pops, offering a massive selection of flavors and designs for any occasion. It bridges the gap between a local bakery and a national gift service.

Key Features:

- Custom Builder: An interactive "Create Your Own" tool that allows users to select specific shapes, flavors, colors, and toppings to visualize their custom order.

- Date-Specific Shipping: Integrated calendar picker allowing customers to schedule shipments for specific future dates.

- Dynamic Product Bundling: Ability to create custom assortments or "Variety Packs" with mixed flavors in a single order.

- Corporate Branding: Specialized service for printing business logos and custom images directly onto cake pops.
